PROFILE

I am a web developer with a strong passion for developing web applications and machine learning models. With experience in both web development and machine learning, I am eager to integrate AI models into web platforms, making cutting-edge technology more accessible and effective for users.

EDUCATION & CERTIFICATIONS

- University of Information Technology, VNU-HCM** 2021 - 2024
Computer Science HCM, VN
 - GPA: 8.16/10.00
- IELTS** Oct 2021
Test Report Form
 - Overall Band Score: 6.5/9.0

SKILLS & COMPETENCIES

- Programming Languages:** C/C++, Python, JavaScript
- Database Systems:** SQL Server, MySQL
- Front-end Stacks:** HTML, CSS, JavaScript, Tailwind CSS
- Back-end Stacks:** Python, Django
- Design Tools:** Figma, Adobe Illustrator, Adobe Photoshop, Adobe Premiere
- Misc:** Git, wireframing and prototyping, problem solving, collaboration and team coordination, knowledge of industry trends, attention to detail

PROJECTS

- Content-Based Information Retrieval System** Nov 2023 - Feb 2024 [\[G\]](#)
Team Size: 5
 - Description: An image retrieval system where the input is an image and the output is a list of the top images that are similar to the input. The system allows users to choose different models and datasets to achieve the desired results.
 - Responsibilities: Train AI model, write documentation.
 - Tech Stacks: Figma, Flask, TensorFlow, OpenCV
- Remove Object from Photo System** Nov 2023 - Jan 2024 [\[G\]](#)
Team Size: 3
 - Description: An image inpainting system that helps users remove people and objects from photos using AI technology. There are 2 ways to select the objects to be removed: manually using a brush tool or automatically using an object detection model.
 - Responsibilities: Design interfaces, integrate multiple AI models, write documentation.
 - Tech Stacks: Tailwind CSS, FastAPI
- E-commerce Website** May 2023 - Jun 2023 [\[G\]](#)
Team Size: 1
 - Description: An e-commerce website that allows users to search for products, purchase, and make payments. Business owners can also register their own store, add/delete/modify products in their store, and manage orders.
 - Tech Stacks: Django, Tailwind CSS
- Karaoke Management Application** May 2023 - Jun 2023 [\[G\]](#)
Team Size: 3
 - Description: The application is used to manage karaoke bars, staff, rooms, products, and more.
 - Responsibilities: Design interfaces, implement functions for the employee role, conduct testing, write documentation.
 - Tech Stacks: Figma, C#.NET, SQL Server, WPF
- Designers and Content Creators** 2021 - 2023
 - Fanpage: [The Associated Organ of Vietnamese Students' Association, Faculty of Computer Science](#)
 - Tech Stacks: Adobe, Figma ([UIT Collegiate Programming Contest](#))
